

A summary of the parents' satisfaction surveys conducted in school year 2018-2019

By BvPO Groningen for IPS Hilversum

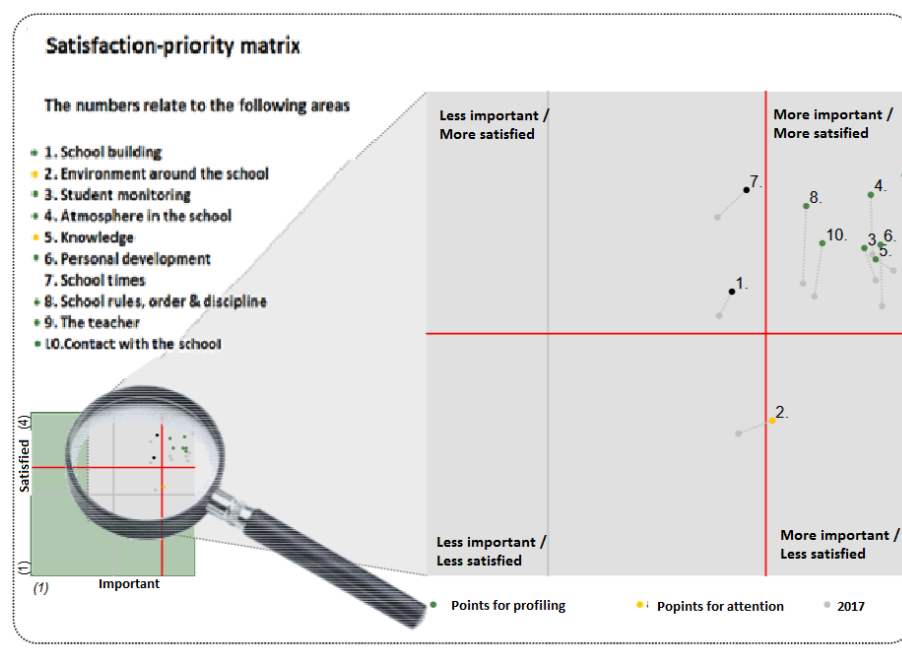

Results of the Parents Satisfaction Survey

Parents, in general, are very satisfied with the school

The survey provides a clear indication of how satisfied parents are with the school.

The average score for all schools in the 'reference group' is 7.5 and for **our school 7.9**.

The appreciation for the school by the parents is scored as 'good'.

According to the survey, the school can use seven significantly positive aspects in its profile:

- The teachers
- Contact between the school & parents
- School rules, order & discipline
- Student monitoring
- Personal development
- School atmosphere
- School Building

According to the survey, a significant area for attention is the environment around the school buildings. The plans to open a new single site to replace the current three split sites will address all concerns.

The surveys will be conducted again in the autumn of 2020. At that point, the results will be summarized and placed in PO Vensters.
